

USER PERSONA

Joseph Borg

Prospective student

Profile:

Joseph is a Prospective student looking to work in the health industry but is unsure on what branch specifically.

- **Most people did not immediately recommend the MCAST website to Joseph.**
- **He wanted to use the website to learn about potential courses in his desired field.**
- **He tried to look for courses on his phone but got overwhelmed and decided that the pc version was easier to use.**
- **He missed the about tab because the website loaded in the middle instead of the top.**
- **After looking through the website and eventually finding the prospectus he decides he wants to look for a career advisor.**
- **Eventually he finds the contact he needed (figure 1)**
- **In addition to finding an advisor he also looks for and managed to find out what jobs and future courses his course would unlock (figure 2)**
- **Overall his experience could have been better and he still had a few questions and new concerns.**

Applied Sciences

Bachelor of Science (Honours) in Nursing

The Bachelor of Science (Honours) Nursing programme prepares learners with the necessary competences and qualifications required to register as a first level nurse both in Malta and in all EU member states. This entails the provision of safe and effective care delivered in an evidence-based, holistic manner to patients and their significant others. The learners will pursue a minimum of 4600 hours over a three-year period, as stipulated by EU Directive 2005/36/EC. These are divided into 2300 theoretical hours and 2300 practical hours, most of which are carried out in clinical placements, and are supervised by qualified nurse mentors. The learners will be equipped with an evidence-based skill set and soft skills that will enable them to be fully capable of practising independently. Learners must cover all the necessary hours and obtain a pass in all theoretical and practical units to be able to apply for registration with the Nursing and Midwifery Council of Malta. This course is recognised across all the EU member states. Applicants will be subject to a values based interview, followed by the presentation of an occupational health screening certificate and a clean police conduct certificate. These documents will serve to establish the suitability of applicants for Nursing and ultimately act towards the final selection of course participants.

Entry Requirements:

MCAST Advanced Diploma in Health Sciences
or
MCAST Advanced Diploma for Dental Surgery Assistants
or
MCAST Advanced Diploma for Pharmacy Technicians
or
MCAST Advanced Diploma in Health and Social Care
or
MCAST Advanced Diploma in Social Care
or
2 A-Level passes and 2 I-Level passes

Course Duration:

3 Years Full-Time

Mode:

Includes an Internship/Clinical Placement as part of Accredited WBL

MQE Level:

6

Credits:

180 credits

Career Opportunities:

State registered nurse

Other Entry Requirements:

Applicants are expected to sit for and successfully achieve competence during a Values Based Interview, as an integral part of the Admission eligibility process.

Applicants will be subject to an occupational health screening to establish their suitability for the Placement which is a mandatory part of the programme. Once course would have started, failure to present a successful health screening (as per an established and set Protocol), will result in not being in a position to start the work placements. This will eventually preclude the students from a successful completion of course. Prior to enrolling on Work Placement, students must also provide evidence of a clean police conduct certificate.

Notes:

Applicants with an A- or an I-Level background in Biology, Chemistry, English, Mathematics, Psychology, and Sociology will better benefit with studies from this programme of studies.

30 MCAST Prospectus 2025-2026

Figure 2

When writing my user persona, I made sure to always reference my data. The first thing I did was reference the results shown in (figure 3). I wrote that most of his friends did not immediately recommend the MCAST website. The next step was figuring out whether the pc or mobile version of the website is better. Since according to my data the mobile version works fine but the pc version is better (figure 4) I wrote that he first used the mobile version but then moved on to the pc version. I did not mention that he had any accessibility issues since most people answered that they did not. Throughout the user persona I mentioned a few issues with user experience but not too many since the overall rating was 3.25 (figure 5) From the information I gathered and my own experiences I mentioned that he still had some questions about the school in general since this was his first time applying for an MCAST course.
